

# NSW Regional Conference

Novotel Pacific Bay Resort, Coffs Harbour

Monday 15 to Wednesday 17 October 2012

## Conference Theme: Regional Water – Challenges and Achievements

Droughts, floods and government reviews are just a few of the challenges that have faced regional water utilities over the last few years. This year's AWA regional conference will bring stakeholders together to analyse the competing demands of the regional situation and to celebrate some of the accomplishments of the last year. To this end, the conference will focus on the challenges and achievements of the regional water industry.

The Conference will feature an open and frank regulatory forum to discuss key issues relating to regional water authorities including water quality, public health, infrastructure operations and asset management as well as policy frameworks and objectives.

Several keynote speakers will set the scene for the conference and this will be a great opportunity for practitioners from both small and large organisations to share information and gain confidence in pathways to meet the challenges ahead.

This conference is a key technical and networking event for everyone with an interest in the regional water cycle.
